DETAILED ACTION

Drawings

1. Figure 11 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1 and are rejected under 35 U.S.C. 102(b) as being anticipated by Garrison et al (US Patent 5,910,945).

Regarding to claims 1, 8, and 15, Garrison discloses a packet communication system comprising a plurality terminal equipments 16-18 that conduct communication operation at periodic timing (fig. 1 col. 3 lines 65-67) and relay equipments 12-14 that relay packets transmitted between said terminal equipments (fig. 1 col. 3 lines 65-67), wherein synchronization control packets 38 for timing synchronization are transmitted

Art Unit: 2663

between adjacent equipments to thereby establish synchronization of operation timing (fig. 2 col. 4 lines 13-20), each of said terminal equipments 16-18 and relay equipments 12-14 including, a synchronization request unit 66/84 which transmits a synchronization request packet to an adjacent equipment at own operation timing and thereby performs a synchronization request 200/302 (fig. 3, 6, and 8 col. 8 lines 16-19 and col. 9 lines 35-38); a synchronization response unit 67/80 which is responsive to acceptance of a synchronization request packet from said adjacent equipment, for transmitting a synchronization response packet corresponding to the synchronization request packet according to own synchronization timing and thereby conducting synchronization response 206/306 (fig. 3, 6, and 8 col. 8 lines 40-49 and col. 9 lines 60-65); a calculation unit 79/82 which calculates a synchronization deviation value with respect to an adjacent equipment on the basis of a time difference between an arrival time of the synchronization response packet transmitted from said adjacent equipment and own operation timing (fig. 3, 6, and 8 col. 8 lines 19-25 and col. 9 lines 39-52); and a correction unit 68/84 which corrects operation timing of the own equipment on the basis of the synchronization deviation value calculated by said calculation unit (fig. 3, 6, and 8 col. 8 lines 30-40 and col. 9 lines 53-65).

Allowable Subject Matter

4. Claims 2-7 and 9-14 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
5. Claims 16 and 17 are allowed.

Art Unit: 2663
